

## REMARKS

The specifications have been amended to provide a proper reference to the parent and grandparent applications. This application is a Continuation of United States Patent Application Ser. No. Serial No: 10/207,554, now United States Patent \*\*\*\*\*, which is a continuation of 09/578,623 filed on May 15, 2000, now United States Patent 6,443,228. The formal drawings entered in the Parent Application have been entered herein. Additional amendments to the specifications required in the Parent Application have been entered.

All the claims filed in the grandparent application have been canceled. New claims 78-88 that were submitted in response to a final rejection in the parent application have been entered. These claims were withdrawn in a response to an advisory action in the parent application as the total number of allowable claims had been exceeded.

No new matter has been added. New independent claim 78 includes the substantive limitations of claim 63 and claim 74. Claim 74 would have been allowable in the parent application if rewritten as an independent claim. Accordingly, applicant respectfully submits that claim 78 and claims 79 – 88 are also patentable under 35 USC § 103 over *Bijleveld* et al. (US 6,241,028B1) in view of *Ciglenec* et al. (US6234257) and *Godbey* et. al. (US3,260,112).

The Commissioner is hereby authorized to charge any fees for the amendments to  
**Deposit Account 02-0429 (014-15383-USC2)**

Date: January 5, 2004

Respectfully submitted
